

HAFFMANS SBF SAMPLE BOTTLE FILLER

PRODUCT LEAFLET

GENERAL PRODUCT INFORMATION

Many quality control and assurance processes in the beverage industry require reproducible and proper samples.

The user-friendly Sample Bottle Filler, type SBF, is a robust instrument for sampling beer and beverages from tanks, piping or kegs, without air intake. It is particularly suited for the creation of beer foam for the Nibem Foam Stability Tester in combination with the Inpack 2000 Flasher Head and the headspace air determination of beer from bright beer tanks.

The SBF is mounted on an empty crown cork bottle. By filling the bottle with water and expelling it with carbon dioxide (CO₂) or nitrogen (N₂), the air is removed. The SBF is connected to a sampling point and under counter pressure, the bottle is filled without foaming. The sample can be prepared for analysis, for example, in compliance with the Nibem standards for foam quality testing, to be brought to a temperature of 20 °C.

BENEFITS

- Perfect product control
- Air free sampling
- Cost saving
 - lower investment costs (one device for sampling from different sources)

APPLICATIONS

- Laboratory

HAFFMANS SBF

SAMPLE BOTTLE FILLER

PRODUCT LEAFLET

TECHNICAL DATA

Container

Crown cork bottle

Bottle height

max. 275 mm

Connections

Sampling hose \varnothing 6 mm / \varnothing 4 mm
CO₂/N₂ 3/4" BSP / 5/8 BSP

CO₂/N₂ pressure

Max. 4 barg

Dimensions

200 x 80 x 410 (L x W x H mm)

Weight

1 kg

SCOPE OF SUPPLY

- Sample Bottle Filler, type SBF
- Bottle burst protection net
- Set of tubing
- Quick connection for \varnothing 4 mm hose connection
- Quick connection for \varnothing 6 mm hose connection
- Instruction manual

OPTIONS

- Inpack 2000 Flasher Head
- Double end quick coupling (for headspace air determination)
