

Wet Gas Extractive Dust Measurement EXO

**Temperature controlled
continuous particulate
measurement for
wet processes**

LED based, forward scattering instrument to measure dust concentrations in difficult wet gases

- Isokinetic sampling
- Continuous dust levels as low as 0.1 mg/m³
- Sample stream isolated from optics with air curtain to extend maintenance interval
- Accurate linear measurement for all kinds of dust
- Color touch screen for easy parametrization
- LED light source covers different particle size distributions and is less affected by particulate characteristic
