

Labino® Torch Light UVG3 Midlight

< 1 Lux | 365 nm | >6 500 $\mu\text{W}/\text{cm}^2$ | Ø 10cm
Minimum Glare

- The Labino® Torch Light UVG3 Midlight is a UV-A LED torch designed specifically for applications where the amount of visible light from the LED is critical.
- The Labino® Torch Light UVG3 Midlight produces a narrow intense ultraviolet beam measuring over 6 500 $\mu\text{W}/\text{cm}^2$ at a distance of 38 cm (15 inches) with a minimal amount of visible light. The size of the beam measures 10 cm Ø (3.9 inches).
- The unique white light filter does not only decrease the transmission of white light from the LED, it also minimizes reflection from the surface which is illuminated with UV.
- Full power is reached instantly. The on/off button is positioned in the back of the lamp to prevent accidental activation.
- At full charge the battery provides up to 3 hours of use. Recharge from a normal outlet or vehicle with included chargers. An extra battery is included.
