

Labino® Astra Torch LED

6 COLORED HEADS & 1 UV | POWERFUL RUNS ON LI-ION OR ALKALINE BATTERIES

MAKES IT BRIGHT

- The Astra Torch is a cordless battery operated torch light based on the LED technology.
- The Astra Torch offers six (6) different coloured heads and 1 UV head and you are free to combine your own unique ALS – all kits includes a UV light head and then you add as many coloured heads as you like.
- The UV Head is available in two different light beams; 1° giving approx. 12000 $\mu\text{W}/\text{cm}^2$ (recommended if you need a very strong lamp) and 5° giving approx. 3000 $\mu\text{W}/\text{cm}^2$ (if you prefer a larger light beam).
- The light emitting diodes emit a beam of light that is “evenly” distributed powerful.
- The torch can be operated with 3 normal alkaline batteries, if you run out of battery.
- Its compact size makes it easy to work with and with an instant-start function you get full power immediately.
- Manufactured by Labino in Sweden.
