

Automatic isokinetic sampler

ISOSTACK

G4

USB

Main characteristics:

- In accordance with UNI EN 13284, EN 10169 and US EPA M5, M17.
- Fast isokinetic control at any stack condition.
- Volume measurement with dry gas meter.
- Sampling flow measurement with mass flow meter.
- In-stack temperature and velocity measurement.
- Autotest and anomalies management.
- **USB** interface to download data.
- Wide **Graphic Display**.
- High precision pressure calibrator, with thermal drift compensation device.
- **Wide library** with specifications of the most common ducts.
- **Datalogger** function with saving data on USB key (supplied with the instrument).
- Graphic interface highly intuitive and simple.
- Internal memory capability: up to 256 report.
- Reduced maintenance.
- Available with ISO 17025 accredited laboratory certificate.

With Isostack G4 TCR Tecora introduces the 4th generation isokinetic sampler.

It is the result of a long tradition of isokinetic sampler, started in '80s with Isostack B6.

The solution offered with this new instrument can be summarized in 3 main characteristics:

- Easy to use
- Reliability
- Accuracy/Sampling quality (QA/QC)

Easy to use

Isostack G4 offers two different configuration to meet different type of use.

It is available in a "all in one" and in a "split" version.

The first is dedicated to whom wish to reduce the costs and have the maximum portability.

The second to whom wish to carry on stack platform only the control panel and leave on plant floor the pump unit.

Probes and filter heating now managed directly from the integrated electronics of the instrument.

New functionalities of the software allow to manage the sampling in an easy and intuitive manner.

Isostack G4 split version

New utilities:

- auto check at starting;
- leak test in line during sampling;
- calculation for MSSI impactor;
- ducts' library;
- log measurements and alarms;
- automatic re-start in case of flue gas velocity alarm.

Reduction of cables and connections

toward probes and other devices: a single umbilical cable includes the cables for the heated uses.

Portability and sturdiness empowered through a steel and aluminium frame and ABS panels.

Sampling flow even more flexible with 4 - 8 mc/h pumps.

Reliability

Isostack G4 uses quality components which grant reliability in time.

Last generation electronics, which assures high immunity from electromagnetic noisy and designed to work even in severe ambient conditions.

Advanced autotest functions: allow to point out anomalies and malfunctioning before starting the sampling and eventually to proceed by-passing the anomaly.

Simplified and reduced maintenance: the new pneumatic circuit, the components' arrangement and the removable wide carter frame, make the maintenance operations fast and easy to perform.

"Block pump" function, in case of accidental liquid suction: it switch off automatically the pump, avoiding its damage.

Software upgrade via USB: the customer can update the instrument himself every time a new software version is released.

Keypad

Accuracy/Sampling quality (QA/QC)

Isostack G4 allows to follow quality control procedures for the automatic isokinetic sampling.

Calibration traceability of each sensor and measured parameter. Isostack G4 stores each calibration performed by the user and the manufacturer. The report is downloadable via USB.

Calibration curve on 5 points for each sensor and acquired width.

Correction curve on 5 points programmable by customer for each sensor. Allows to adjust deviations eventually found during re-calibration.

Volume measurement redundancy now coming from a mass and a volume meter.

Autocalibration function: permits to verify the calibration of flow and volume measurement elements and eventually to adjust them to an external reference.

High precision pressure sensor with thermal drift compensation.

Thermocouple calibration curve following ITS 90 standard.

Parameters saved on instrument's report:

- Instrument's serial number
- Sampling date/hour
- Duct's temperature
- Duct's absolute pressure
- Flue gas velocity
- Duct's flow
- Duct's parameter
- Sampling duration
- Atmospheric pressure
- Sampling line pressure
- Sampled volume
- Nozzle's flowrate
- Sampler's range
- Isokinetic deviation
- Heated box temperature
- Heated probe temperature
- Condensation bath temperature
- Condensation bath's gas outlet temperature

Stored report type

Measurement report
Punctual report
Sampled point summary

Measurement Log

Parameter's record with time
Programmable integration

Report format

- Compatible with the following operative systems: Windows XP and 7, Linux, Mac OS, Google Chrome OS.
- Compatible with Microsoft Office, generic database, SUN Open Office suite.

Isostack G4 all in one version

Isostack G4 is available with different configurations:

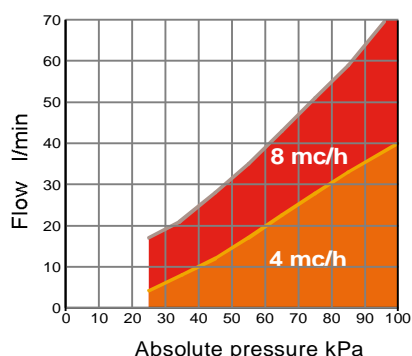

Isostack G4 ONE "All in one" version 4 m ³ /h "All in one" version 8 m ³ /h	P. supply (220 Vac ± 10% 50/60 Hz) AC99-025-0000SP AC99-025-0001SP	P. supply (90-130 Vac ± 10% 50/60 Hz) AC99-025-0010SP AC99-025-0011SP
Isostack G4 TWO "Split" version 4 m ³ /h "Split" version 8 m ³ /h	AC99-025-0003SP AC99-025-0004SP	AC99-025-0013SP AC99-025-0014SP
Control Unit G4 TWO	AC99-025-0020SP	

Accessories

- H ₂ O suction sensor	AC99-025-9901SP
- Box probe thermoregulator	AC99-025-9902SP
- n° 2 thermocouple inlet aux	AC99-025-9903SP
- Automatic autozero	AC99-025-9904SP
- Battery portable printer	AC99-025-9900SP

Battery portable printer

Compensation curve pump 4 - 8 mc/h

Control Unit G4 dimensions

Technical characteristics

Differential pressure

Range	0 - 2500 Pa (0 - 250 mmH ₂ O)
Accuracy	better than 1% of measure \pm 2 Pa
Resolution	0.1 Pa (0.01 mmH ₂ O)
Differential pressure max	30 000 Pa (3000 mmH ₂ O)

Absolute pressure (static or barometric)

Range	0 - 105 kPa (1050 mBar) absolute
Accuracy	better than 1% of measure \pm 0.1 kPa
Resolution	0.01 kPa (0.1 mBar)

Temperature

N° of inlet for thermocouple K type	up to 5 (depending on model)
Resolution	0.1 °C
Thermocouple type K	0 + 1200 °C
Accuracy	1% of measure \pm 0.2 °C

Dry gas meter temperature	Pt 100 sensor (4 spins)
Range	-20 + 80 °C
Accuracy	1% of measure \pm 0.2 °C
Resolution	0.01 °C

Volume measurement

With dry gas meter	G2.5 o G4 (depending on model)
Resolution	0.1 litre
Accuracy	2%

Flow measurement

Answering time	500 ms
Mass meter	5-40 l/min (with 4 m ³ /h pump) 8-60 l/min (with 8 m ³ /h pump)
Resolution	0.01 litre
Accuracy	better than 2%

Range regulation

Type	electronic
Answering time	> 2 s

General specifications

Suction pumps	rotative pumps 4 or 8 mc/h
Interception duct's valve	totally isolated
Suction gas filter	built-in glass fiber
Water sensor	built-in (*)
Gas connections and pitot	quick connections
Communication ports	USB 1.0; 1.1 e 2.0
Printer port	RS232
Working temperature	-20 +40°C 95% UR
Power supply	220 Vac 50/60Hz - (110Vac 50/60Hz)
Working without main supply	buffer battery
Display	graphic LCD 128x64 pixel
Keypad	membrane with tactile effect
Weight	15 Kg (4 mc/h) 19 (8 mc/h)

(*) optional
