Object: New available gases  
 Ref : 231003 Easy Duo

The Easy Duo range of gases has been expanded to include carbon monoxide, hydrogen, and methane, in addition to the existing options of oxygen and carbon dioxide.

The Easy Duo solution caters to the demand for concentration visualization, along with safety control equipment, conveniently located near the detection point. To recap, the Easy Duo packaged solution comprises an MX16 wall-mounted control unit paired with an OLCT10N detector. A 10-meter cable is also included for connecting the detector to the control unit.

Thanks to its competitive pricing and an optimized supply chain through a single reference, this solution is the ideal choice for our partners and distributors.

Furthermore, in an effort to enhance the clarity of our product references, we've redesigned the MX16 configuration matrix in alignment with the structure provided below, using familiar gas codes.

MX16 -A - B - C - 0 - 0

A	B	C
Version	Gas and range	RS485 Output
0 – Configurable Version A – Analog Channel (Preconfigured) N – Easy Duo (Preconfigured)	000 Configurable Version 001 CH <sub>4</sub> (5 % Vol) 002 CH <sub>4</sub> (4,4 % Vol) 003 H <sub>2</sub> (100 % LEL) 200 O <sub>2</sub> (30 % Vol) 204 CO (300 ppm) 239 CO <sub>2</sub> (5 % Vol)	0 - None 1 - With
